Slip Trip & Falls

According to U.S. department of Labor, Slips, trips & fall makes majority of general industry accidents. 25% of reported claims per fiscal year were dure to STF. Over 17% of all disabling work injuries are result of fall. The commonly affected body parts are Knees, Ankle, Foot, Wrist, Elbow, Back, Shoulder, Hip & Head but **Using your eyes can save your life.** The main factors involved **Gravity, Friction, Momentum & Balance which can impair person's vision, judgement or balance.** For example :

Physical & External Conditions like fatigue, improper illumination, congested areas or lying cables on route ways etc.

Not using guards, signages or reflectors when slip or trip hazard exists.

Behaviors actions you choose can contribute to a STF injury. For example, Breaking 3-point contact while climbing ladder or working from the top two rungs of ladder as this makes it unstable & prone to tip over.

Carrying or moving cumbersome objects, or too many objects, that obstruct your view impair your balance & prevent you from holding into handrails.

Using improper cleaning methods Incorrectly using wax or polish or trying to clean up grease spill with water.

Inattentive behavior Walking distractions example usage of cell phones, talking & not watching your routeways.

Ignoring Protocols or Taking shortcuts not using walkways or designated pathways, Not using Anti-Slippery tapes on stair treads, Poor Housekeeping like Allowing clutter to accumulate, Not cleaning up spills dust or granules etc., Being in hurry, Rushing around, Ignoring to place handrails, Using damage ladder or if rungs are tilted, Loose clothing or foot ware etc.
